EDUCATION

Binghamton University

Vestal, NY

B.S. in Computer Science & B.A. in Mathematics

Expected May 2029

Honors: The Gates Scholarship (Full-ride scholarship awarded to top 1% of applicants nationwide)

Relevant Coursework: Object Oriented Programming, Data Structures and Algorithms, Computer Architecture, Calculus I-III, Number Systems

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, C/C++, SQL, Assembly

Developer Tools: Git/Github, VS Code, Gemini, Linux, Claude Code, Jupyter Notebook, Cursor, Warp, Supabase

Frameworks & Libraries: React, Tailwind CSS, Flask, FastAPI, PostgreSQL, Pandas, NumPy, SQLite

PROFESSIONAL EXPERIENCE

Full Stack Developer

July 2025 – Aug 2025

Saint Lukes Latheran Church & Soup Kitchen

New York, NY

- Increased viewership 68% by engineering a live-streaming system with integrated real-time text displays
- Recovered 50+ staff hours by developing an automated bell system with flexible, custom scheduling tools
- Boosted event participation by 10+ attendees per event through a custom-built digital announcement system

PROJECTS

Phishing Chrome Extension | *JavaScript, HTML, Flask, Gemini, SQLite*

Nov 2025 – May 2026

- Developed a detection engine using Gmail API to analyze email DOM and metadata in real-time
- Achieved a 97.5% detection accuracy by pairing heuristic scoring with Gemini-powered ML threat predictions
- Optimized performance via asynchronous Fetch API calls, reducing latency in risk assessment delivery
- Engineered a security dashboard using FastAPI to provide users with instant, actionable risk scores

Financial Market Watch System | Bloomberg Tech Lab | *RabbitMQ, Python, Pika, Docker*

Feb 2026

- Architected a distributed system using Python and RabbitMQ to simulate real-time stock ticker updates
- Implemented Topic Exchanges to enable filtered subscriptions based on routing keys like sector or ticker
- Applied OOP principles to build scalable, decoupled producer/consumer modules for clean data flow
- Containerized infrastructure via Docker to ensure environment portability and deployment consistency

Call Listener Portal @ SBUHack '25 | *TypeScript, Tailwind CSS, Node.js, NeuralSeek*

Nov 2025

- Collaborated in a 3-person team to engineer an AI-driven tool automating insights from customer data
- Integrated NeuralSeek and Watson to architect a chatbot featuring call summaries and trend analysis
- Developed a responsive frontend using TypeScript and Tailwind CSS for seamless data visualization
- Managed asynchronous data flows between AI endpoints and the client interface using Node.js

LEADERSHIP AND INVOLVEMENT EXPERIENCE

President

Sept 2025 – Present

ColorStackBU

Vestal, NY

- Generated \$800+ in funding via bake sales and supported executive board with strategic planning initiatives
- Facilitated 11 workshops for 20+ attendees, leveraging expertise to improve technical and professional skills

Project Management Intern

Nov 2025 – Apr 2026

StackHacks

Vestal, NY

- Coordinated project management across 4 technical divisions, delivering 4 projects within a 6-month timeline
- Briefed 7 executives on different team leads reports to optimize the development lifecycle and outcomes
- Managed time and budgeted to spearhead a technical workshop and fundraiser from proposal to execution

Hobbies/Interest: Photography, Rock Climbing, Hiking, Chess, Soccer, Volleyball, Reading, Music, Kayaking, Painting
